**Subject:** Dimock Residential Ground Water Sampling - Round 3 DRAFT Data Reports for HW-8a/b

Attached for your review please find PDFs of the "Toxicologist Reports" and "Draft Residential Data Reports" for HW-8a/b sampled earlier this month.

Please note that the wellhead (located at the Primary residence HW-8a) was sampled as well as the taps at HW-8a and HW-8b. Each residence has individual per-existing treatment systems. Since the residences were receiving bulk water and were connected to water buffalos, this is the first time that we have sampled the taps.

I understand that you were previously made aware of the preliminary results. Please review and provide any comments you may have on the attached reports by 5 pm today at the latest (earlier, if at all possible). Again - I apologize for the short turn-around. Final reports will be prepared for the distribution to the residents by Monday 7/23/12.

While the data has been validated and is considered final, the reports are considered DRAFT until our review is completed. Please be sure to limit the distribution of these reports to an internal review as we have not yet shared the data with residents or with PADEP.

The "tox" reports include additional information (e.g. lab qualifiers, MDLs, QLs, RLs) to assist in the tox review which is not included in the residential reports.

As with the previous data reviews, the R3 tox will prepare a memo with her findings following review of the data.

A glossary/key is included with the residential report.

Please do not hesitate to contact me via e-mail or cell phone (267-273-8859) with any questions and/or if you need additional info.

Thank you - Kelley
